# CHECKLIST FOR MEDICAL NECESSITY DOCUMENTATION

Proper documentation is essential for receiving accurate and timely reimbursement. Please ensure that all coding and documentation is completed accurately and in its entirety. When responding to medical record documentation requests (vs the initial claims submission), the following checklist may be helpful:

- Be sure the medical record documentation submitted is complete and legible
- Submit records for all dates of service on the claim under review
- The medical record(s) submitted must prove that the service(s) was (were) ordered and rendered
- The medical records must justify medical necessity. The MAC may ask for the following documentation:
  - Office notes for the dates of service
  - Physician's progress notes (for hospital outpatient services)
  - Initial history and physical
  - Physician orders
  - Infusion procedure notes
  - Diagnostic tests, X-rays, and laboratory results
- Documentation of reason for treatment:

*NOTE: Exercise your medical judgment and discretion when providing a diagnosis and characterization of the patient's medical condition.*

  - What is the patient's diagnosis, condition, and history?
  - What previous therapies has the patient undergone for the symptoms associated with his/her condition?
  - What has the patient's response been to these therapies?
  - Describe the patient's recent symptoms and conditions
  - Provide your professional opinion of the patient's likely prognosis without treatment with SIMPONI ARIA® (golimumab)
- Any other documentation a provider deems necessary to support medical necessity of services billed, as well as documentation specifically requested by your MAC
