

# EFFECTIVE OCTOBER 3, 2016 MEDICARE BILLING & CODING UPDATE

The Centers for Medicare & Medicaid Services (CMS) has established a code for billing the ambulatory infusion pumps used in extended intravenous infusions for Medicare patients. This guidance applies to all A/B Medicare Administrative Contractors (MACs) for such drugs, including YONDELIS® (trabectedin).<sup>1</sup>

- Effective October 3, 2016, the administration and pump charge associated with YONDELIS® should be reported with HCPCS code **G0498**<sup>1</sup>
- The drug charge for YONDELIS® should continue to be billed using the appropriate HCPCS code based on the administration setting (see table below)<sup>1</sup>

| Category                | Setting   | Code Type  | Code  | Description   |
|-------------------------|---|------------|---|---|
| Drug                    | As Required   | NDC Code   | 10-digit NDC:<br><b>59676-610-01</b><br>11-digit NDC:<br><b>59676-0610-01</b> | Single-use vial containing 1 mg of trabectedin lyophilized powder |
| Drug                    | Physician Practice Setting                                  | HCPCS Code | <b>J9999</b>  | Not otherwise classified antineoplastic agent                     |
| Drug                    | Outpatient Hospital Setting                                 | HCPCS Code | <b>C9480</b>  | Injection, trabectedin, 0.1 mg                                    |
| Administration and Pump | Physician Practice and HOPD when an Ambulatory Pump is Used | HCPCS Code | <b>G0498</b>  | Chemotherapy, extended intravenous infusion with ambulatory pump  |
